

**INCEPTION MOBILE
OVERVIEW**

HOW DOES INCEPTION MOBILE WORK?

Inception Mobile offers increased flexibility for device support and remote access. For journalists and content-creators on the go, the app offers a tailored user experience designed specifically for a handheld device. It also provides secure remote access to stories, messaging and assignments.

How does Inception Mobile communicate with my local installation of Inception?

To use Inception Mobile, an Inception system must be running v15.5 or later. For a purchased system, an active software maintenance agreement is required. Active Inception.cloud subscribers can also use the app.

Is there an additional cost to the use Inception Mobile?

There is no additional cost to use Inception Mobile. Any edition of Inception Live or Inception News including a purchased Inception system with an active software maintenance agreement or an active Inception.cloud subscription is eligible to use the app.

Are any changes required to the network?

For a purchased Inception system running on your network, there are no changes required to the network or to the firewall. There are configuration changes required in the Inception software that can be done during the initial installation of the software or during the upgrade to v15.5 or later.

How does Inception Mobile communicate with my local installation of Inception?

If allowing users to connect to Inception from outside the network, the local Inception software will establish a secure web socket connection with the Ross App Gateway. All mobile apps used outside the network will connect to the Ross App Gateway and never connect directly to the Inception software. The Ross App Gateway is run by Ross Video in Amazon Web Services (AWS).

What functionality is included in Inception Mobile?

Inception Mobile is designed primarily with the journalist in mind to support remote access to Inception for creating and modifying broadcast stories, messaging with other users in Inception and viewing assignments. Additional functionality will continue to be added in the future.

What devices can use Inception Mobile?

Inception Mobile is available for both iOS and Android and has been tested with a variety of devices including phones and tablets.

How many people can use Inception Mobile simultaneously?

There are no limits on how many users can install Inception Mobile. But the limit for users actively logged into Inception using the app is part of the overall concurrent user limit for the Inception system. Each user, regardless of whether they are logging in natively using a web browser or through the app will count as one user.
